Hi Karen,

I've been away for a few weeks and just saw this.

CCWD has a point, which is basically the same one we started with many years ago...a conveyance that moves water from the Sacramento to S. CA bypassing the Delta will adversely impact water quality for those taking water from the Delta. NBA, CCWD and to some extent SBA will be losers, unless their situations are addressed. Would imagine that this would be a significant issue for EPA's review of the NEPA docs for this.

Happy to help, now that I'm back.

hey bruce -

I could use your help as we review the next round of BDCP documents. As raised by CCWD in the attached letter, we need to get back into looking at the issue of potential dw impacts from different Delta conveyance scenarios. As Greg says in his letter, there is not complete information readily available, so I am not sending you any specific documents to review right now. I'd like to find a time later this month to catch you up on where things are and discuss how best to involve you in our review process. I'm out from today till August 13 so maybe in the second half of August? Thanks. - Karen
